Overview

Homework assignment for UCI Bootcamp. Overall goal is to create a self portfolio page to showcase skills and talents to fill a part-time or full-time position.

## Goals

---

This portfolio's acceptance criteria include:
1. Potential employee's previous work.
2. Developer's name, recent photo, and links to sections about them, their work, and contact information.
3. A working NavBar
4. A section of developer's work with titled images of developer applications
    a. When the images are hovered, they should be larger than other images.
    b. When the images are clicked, the link will take me to the developer app
5. A responsive layout that adapts to viewport for various screens and devices.

Phases

Project is due April 2, 2022 and phases include:
1. Phase 1 - Create Site Map via GlooMaps
2. Phase 2 - Create Site Design via Figma
3. Phase 3 - Create codebase using HTML/CSS
4. Phase 4 - Customize for adaptability
5. Phase 5 - Customize for accessibility
6. Phase 6 - Refractor
